High-Frequency Trends: Non-Resident EM Portfolio Flows

To complement our weekly fund flow data, we track high-frequency (daily and weekly) EM portfolio flow data. These data provide more comprehensive coverage of EM flows but are only available for certain countries. Figure 34 shows daily non-resident EM flows over the past week for countries where data are available, in addition to total flows over the last week, month, and three months. Figure 35-36 show three-month cumulative flows, and Figure 37-38 show one-year cumulative flows.

Weekly Retail Fund Flow Model: EM Bonds

We present our weekly retail flow models for EM hard currency and local currency bonds. These models help gauge whether current retail bond flows are higher or lower than expected, given bond returns and previous retail bond flows. We show weekly differences between actual retail flows and modeled retail flows and differences over the past four weeks using weekly data.

EM-Dedicated Retail Bond Fund Beta Trackers

In this section, we present our high-frequency beta trackers for EM-dedicated retail bond funds. These beta trackers help gauge real-time fund positioning: betas above 1 indicate overweight positioning, betas less than 1 indicate underweight positioning, and a beta of 1 indicates neutral positioning. We show 21-day rolling AUM-weighted fund betas over the past year, using daily data. Our sample includes benchmarked EM-dedicated retail bond funds with a minimum AUM of \$200mn.

Appendix: A Guide to the EM Flows Weekly

This report analyzes EM flow trends in bonds and equities, focusing on high-frequency EM-dedicated fund flow data from EPFR and non-resident EM gross portfolio flow data from official sources.

- Weekly EM bond and equity fund data from EPFR provide timely information on fund flow trends and are released on Thursday afternoon for the week ending close of business Wednesday. More comprehensive monthly EPFR data are released on the 16th of the following month, and we incorporate these data when they become available.
- Our longer-term headline numbers for EM bonds also include strategic flows. Strategic flows are EM bond flows from longer-term institutional mandates that are typically managed in separate accounts and funded from sources such as pensions, endowments, and insurance companies. We estimate strategic inflows using a quarterly survey as part of our monthly EM Client Survey, which polls around 200 investors managing over \$1.4tn in EM bond and currency assets.
- Alongside weekly fund flow data, we report high-frequency non-resident EM gross portfolio flow data from official sources. EPFR fund flow data are categorized by domicile, while non-resident EM gross portfolio flow data are categorized by residence, like in the Balance of Payments. For further details, see “What’s covered in this report?”

Important Disclosures

Company-Specific Disclosures: Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan-covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Explanation of Emerging Markets Sovereign Research Ratings System and Valuation & Methodology:

Ratings System: J.P. Morgan uses the following issuer portfolio weightings for Emerging Markets Sovereign Research: Overweight (over the next three months, the recommended risk position is expected to outperform the relevant index, sector, or benchmark credit returns); Marketweight (over the next three months, the recommended risk position is expected to perform in line with the relevant index, sector, or benchmark credit returns); and Underweight (over the next three months, the recommended risk position is expected to underperform the relevant index, sector, or benchmark credit returns). NR is Not Rated. In this case, J.P. Morgan has removed the rating for this security because of either legal, regulatory or policy reasons or because of lack of a sufficient fundamental basis. The previous rating no longer should be relied upon. An NR designation is not a recommendation or a rating. NC is Not Covered. An NC designation is not a rating or a recommendation. Recommendations will be at the issuer level, and an issuer recommendation applies to all of the index-eligible bonds at the same level for the issuer. When we change the issuer-level rating, we are changing the rating for all of the issues covered, unless otherwise specified. Ratings for quasi-sovereign issuers in the EMBIG may differ from the ratings provided in EM corporate coverage.

Valuation & Methodology: For J.P. Morgan's Emerging Markets Sovereign Research, we assign a rating to each sovereign issuer (Overweight, Marketweight or Underweight) based on our view of whether the combination of the issuer's fundamentals, market technicals, and the relative value of its securities will cause it to outperform, perform in line with, or underperform the credit returns of the EMBIG index over the next three months. Our view of an issuer's fundamentals includes our opinion of whether the issuer is becoming more or less able to service its debt obligations when they become due and payable, as well as whether its willingness to service debt obligations is increasing or decreasing.

J.P. Morgan Emerging Markets Sovereign Research Ratings Distribution, as of July 4, 2026

	Overweight (buy)	Marketweight (hold)	Underweight (sell)
Emerging Markets Sovereign Research Universe*	9%	84%	7%
IB clients**	100%	84%	100%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject issuers within each of the "Overweight," "Marketweight" and "Underweight" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Marketweight rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. The Emerging Markets Sovereign Research Rating Distribution is at the issuer level. Issuers with an NR or an NC designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.
